

Odyssey Group Equipment list

Some of the equipment and gear needed for the Odyssey can be shared with members of your group. With safety and carrying-load in mind, there are some equipment and gear that must be provided within the group. This means that not every group member needs to have the item but within the group you must have the required amount of this specific item.

You will find below a Group equipment list for the Oakhill Odyssey. The list has been prepared with both safety and comfort in mind. You will know who is in your group long before you go on the Odyssey. We recommend that you read the list carefully and coordinate with your group members to ensure that your group has all the required equipment.

GAS COOKERS

During the Odyssey, meals will mostly be prepared by using gas cookers. Each group must supply their own gas cookers with refill gas canisters. Groups will only need to carry the cookers and one gas canister per cooker with them, the refill canisters will be provided on the route. As a fire safety measure, only 1 gas cooker per 2 people is allowed for the Odyssey. This means your group will have 6 cookers to prepare meals which are more than enough. The cooker you are looking for is a small camping cooker, not the big ones (Keep in mind that you have to carry it).

VERY IMPORTANT: When buying refill gas canisters you must coordinate within your group to ensure you buy the same brand of canisters as the cookers. Not all canisters fit on all cookers! Every group member must bring 2 refill canisters. The refill gas canisters must be dropped off at the school no later than 6 February 2012, 3 weeks before the start of the Odyssey. EARTH SCOUT at the Knysna Waterfront has a range of gas cookers suited for the Odyssey and are ready to assist you with their professional opinion.

GROUP EQUIPMENT

- A strong, all-weather, 2 man tent (shared between 2 people)
- Camping gas cooker (shared between 2 people)
- Cooking utensils (pan or pot to prepare food in; etc. – shared between 2 people)
- Refill gas canisters for cooker (each learner must supply 2 canisters)
